Notre Dame de Namur University – Belmont, CA

English Tutor, Student Writing Center: September 2002 – May 2005

Personal Interests:

My highest core values are Spiritual development, education, family, and love. I enjoy singing, dance, and reading. I am happiest when my five children are happy. As a Doctoral student, the effects that raising EQ levels in students would have on academic achievement in those with SLD (Specific Learning Disability) is the basic idea for my dissertation, research question and focus. Although, I am an old fashioned school teacher at heart, I have hopes of designing a Mentor Match-Making service, wherewith I can connect Youth with professionals, as well as provide support, through consultation and advocacy, to those young adults with mild/moderate learning disabilities.
